

## **March 11, 2026: On Attacking Me Then Condemning Me for Fighting Back**

If I were a sovereign nation that was being attacked by one country in particular that was being supported in that attack by a plethora of smaller input by other countries,

- would I be condemned for seeking to eliminate the smaller inputs against me while defending myself against the main attacker?

Apparently in the United Nations in 2026, I am not allowed to defend myself against those that are attacking me from a closer range and with more even fire-power of my own. I am condemned for seeking to end the small-scale attacks in order to defend myself from the large scale war being waged against me?

**I don't agree and I would not have backed this resolution:**

## ***U.N. Security Council Condemns Iran's Retaliatory Strikes in the Middle East***

In an overwhelming vote, the council backed a resolution condemning Iran. A Russian proposal calling for an end to the war that didn't assign blame or even name the parties, was rejected.

Share full article

It specifically condemned Iran's attacks against residential areas and civilian objects — demanding their immediate cessation — while also demanding that Tehran halt its threats, provocations and actions aimed at interfering with maritime trade, as well as support to proxy groups across the region.

"The message is clear", said Bahrain's representative, welcoming the Council's adoption and the text's sweeping global support. "The international community is resolute in rejecting these Iranian unjust, hostile acts that are targeting sovereign countries and that threaten the stability of their peoples."

Noting that nearly 140 Member States co-sponsored the resolution, he said that high number reflects the world's "collective conscience". The Gulf region is a pillar of global security, trade and economic stability, he added, emphasizing that protecting the Middle East is therefore in the entire world's interest.

**BAHRAIN, ARE YOU NOT ONE OF THE MANY COUNTRIES ACROSS THE WORLD HELPING THE UNITED STATES TO CARRY ON THESE ATTACKS?!**

How can you then condemn the victim of those attacks for responding in kind or by whatever means they have available to preserve their own self and the welfare of their own citizens?

## ◆ AI Overview

As of March 2026, Bahrain is acting as a critical, front-line ally for the United States in the conflict with Iran, hosting the U.S. Navy's Fifth Fleet headquarters, which serves as a central hub for operations. Bahrain has activated defense pacts with the U.S. and UK, and is facing direct Iranian retaliation, including strikes on infrastructure, due to its support of U.S. military actions. 🇶🇦 WEAU +4

Key details regarding Bahrain's role in the conflict:

- **Military Hub:** Bahrain hosts the Naval Support Activity (NSA) Bahrain, which is the heart of U.S. naval operations, supporting warships, mine countermeasure vessels, and logistical ships.
- **Direct Involvement & Attacks:** The U.S. is using bases in Bahrain to support air operations, leading to Iranian retaliatory strikes against the 5th Fleet headquarters and local infrastructure, including desalination plants.
- **Defense Cooperation:** Bahrain has activated defense pacts with the United States and the United Kingdom.
- **Strategic Support:** Bahrain has participated in diplomatic efforts against Iran, presenting resolutions at the UN on behalf of Gulf Cooperation Council states.
- **Vulnerability:** The country has faced significant threats, with reports of Iranian drones hitting areas near U.S. personnel and critical infrastructure. 🇫🇷 France ONU +7

As the conflict intensifies, Bahrain has become a primary target for Iranian actions due to its close, long-standing security alliance with the United States. 🇺🇸 Stars and Stripes +2

**“Bahrain is acting as a critical, front-line ally for the United States . . . a central hub for operations . . . the heart of the U.S. naval operations . . . ”**

**I would not vote against Iran for needing to defend themselves from American forces being brought through these countries that are offering material support to the United States to wage this war.**

**I just don't believe that the God-given rights of self-preservation allow for a country to support an attack on someone and not be subject to that entity's ability to defend itself.**

(As I write this I have acoustic attacks being sent into my home from my own government that also believes that it can use local businesses agents, local people, and various 'engines' and 'machines' to privately attack my home without my ability to defend myself. Why would I

support this country going out and attacking a country - **killing innocent children** - and that country have to sit on its hands without a means of defense as well?)

Anyway, back to the points:
